

CERBERUS GRT

Introducing the latest innovation from Shaw Armament, the ThunderCan GRT line of suppressors. These hard use, full auto rated suppressors are constructed using monolithic DMLS 3D printing technology, and made entirely of 625 Inconel steel alloy. This material has been selected for its high durability in extremely high temperature environments while offering top level corrosion resistance. The core employs Shaw Armament's "Gas Reduction Technology" in the design of the baffle stack. The coaxial blast chamber allows gasses to vent into an outer gas path that greatly reduces backpressure and gas blowback, while still delivering top level sound performance due to its internal baffle design. The forward venting front cap design keeps those gasses moving quickly out the front of the suppressor, directing them away from the shooter. These models can handle all the abuse you can throw at them!

Length	7.5 in
Diameter	1.62 in
Weight	17.8 oz (no mount)
Caliber	Up to 300 Norma Magnum
Material Construction	Inconel 625
Finishes	Black or FDE High Temp C Series Cerakote
Barrel Restrictions	None
Durability	Full Auto
Mounts	HUB Mount Compatible / Ships with 5/8x24 Direct Thread Mount

SAS provides a limited lifetime warranty against all manufacturing defects on all products manufactured by SAS. For more information visit:
