

HELLBENDER 9

The Shaw Armament Systems ThunderCan Hellbender 9 is a purpose built 9mm handgun suppressor offering an extremely high value to performance ratio. Constructed of a combination of aluminum and stainless steel, it strikes a perfect balance of weight and durability for your 9mm applications. Each suppressor has an internal booster compatible with ThunderCan proprietary pistons; by removing the booster cap and piston/spring, the end user can swap to a 3 Lug or direct thread mount for carbine applications. By utilizing a modified K baffle design, the Hellbender 9 delivers high levels of sound reduction and a pleasant tone, while still maintaining a trouble-free disassembly for maintenance and cleaning.
