

JEKYLL & HYDE LARGE

556/9MM

The Shaw Armament Systems ThunderCan Jekyll & Hyde series offers the ultimate in suppressor modularity. Utilizing patented dual baffle technology, each Jekyll & Hyde suppressor can be assembled in a small and large bore configuration. This allows the end user to tailor the baffle stack to the diameter of the host weapons projectile, enhancing suppression efficiency and producing better sound reduction performance. Each Jekyll and Hyde suppressor is also length modular. The end user can shorten the suppressor to fulfill the need for a more compact suppressor or leave it full length for maximum sound reduction. No matter the host, the Jekyll and Hyde series delivers premium performance tailored to a wide variety of platforms.

Length	9.0 in (no mount)
Diameter	1.62 in
Weight	16.4 oz (no mount)
Caliber	Small Bore - Up to 6mm diameter, 6mm Creedmoor Pressure Large Bore - Up to 9mm diameter, 338 Lapua Magnum Pressure
Material Construction	Grade 5 Titanium and 17-4 Stainless Steel
Finishes	Satin Bead Blast, DLC
Barrel Restrictions	5.56 - 10", .308 - 14.5", Large Magnum - 18"
Durability	Limited Full Auto
Mounts	HUB Compatible / Ships with 1/2x28 and 5/8x24 Direct Thread Mounts
