

# MINI BEAST 22

The Shaw Armament Systems ThunderCan Mini Beast 22 is a versatile 22 rimfire suppressor delivering high end decibel reduction in a lightweight package. Constructed of a combination of aluminum and titanium, this suppressor has strength where needed to handle magnum rimfire cartridges, while maintaining a minimal effect on handling characteristics of the host platform. By employing a true baffle stack and not a mono-core design, the suppressor has reduced first round pop and a great tone from first shot to last. The Mini Beast 22 is a fully user serviceable suppressor with trouble-free disassembly for regular maintenance and cleaning. A cleaning interval of 500 to 1000 rounds (depending on ammo used) is recommended.
