

OMNIPOTENT 300

The Shaw Armament Systems ThunderCan Omnipotent 300 is a versatile 30 caliber rifle suppressor constructed of 100% titanium. At just 10.4 ounces it has minimal impact on the weight of your weapon system, leading to more familiar handling characteristics and less point of impact shift. The blast chamber and baffle stack incorporate ported vent holes to help minimize backpressure, leading to less blowback and greater recoil reduction than a traditionally baffled suppressor. With a fully welded core, it is capable of handling some medium duty applications, offering a limited full auto rating on shorter 556 and 300 Blk barrel lengths than most of its competitors. Whether mounted on a hunting rifle or your PDW, the Omnipotent 300 will deliver the results you are looking for.

Length	7.8 in
Diameter	1.50 in
Weight	10.4 oz (no mount)
Caliber	Up to 300 PRC
Material Construction	Grade 5 Titanium, Grade 9 Titanium
